

IMPRINT modular panels

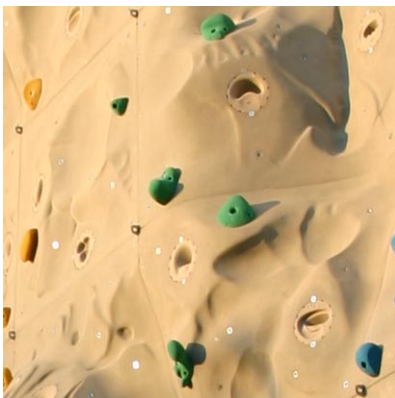

High relief climbing wall panels
Low relief competition panels

IMPRINT signs of quality

SAFETY

- Construction system designed by Entre-Prises' in-house technical department in accordance with the European Standard for Artificial Climbing Structures (EN12572)
- Individual top-rope system with screwgate and snapgate carabiners featuring easy-clip gates and shrouded noses.
- Impact resistant. Glass Resin Panels provide strength and stability to all designs.

QUALITIES

- The original, patented, three dimensional, interchangeable panel system.
- 45 panel options available. Slabs, overhangs and vertical climbing can all be included.
- Climbing lines and leader protection points are positioned at one-metre intervals to allow ground up ascents of each climbing line.
- Modular panel system allows a fast installation.
- 9 to 13 bolt-on hold inserts/m² on high relief panels and 20 inserts/m² on low relief panels.

AESTHETICS

- High relief climbing wall panels and low relief competition panels available.
- 2 colours available. Light brown or grey. Custom paint scheme can be added after installation.
- Invisible fixation method between the panels and the sub-structure. The panels are fixed on the interior of the climbing wall.
- Side and corner panels are manufactured in Cristalithe. Panels can be combined with any other Entre-Prises panel system.

DURABILITY

- Product guaranteed for five years when coupled to annual maintenance agreement.
- One maintenance visit / inspection per year recommended.
- Threaded bolt-on hold inserts, do not turn, do not fall out.
- Perfect for Outdoor use. Stainless steel fixings used for these installations.
