

PROTECTIVE MATTING

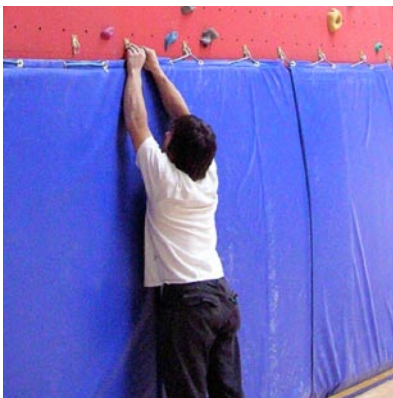

Lightweight and durable
Simple to use

SAFETY SURFACES signs of quality

SAFETY

- Hinged matting prevents unauthorised access to the facility.
- Provides a protective cover and stops other users of the multi-use area from hurting themselves should they collide with the wall.
- Provides a smooth rebound surface for ball games taking place within the multi use area.
- Offers excellent support for traversing or rope protected climbers who may get lowered a little faster than anticipated.

QUALITIES

- High density, closed cell sections of foam mats encased with 900gsm PVC heavy duty nylon covers.
- Foam is combustion modified, highly resilient polyurethane foam. Fire retardant to BS5852 Part 2, Ignition Source 5.
- Cover is PVC coated nylon, fire retardant to BS5438.
- Lightweight, durable and simple to raise and lower. Easy to clean.

AESTHETICS

- Each section of mat measures 50mm in depth and 2000mm in height. Standard width dimensions of 1000mm, 1200mm and 1500mm are available.
- Discreet but durable fixings at top and base of mat sections. Simple to use.
- Available in blue but other colours also available.
- Custom made laser welded logo applied to each section of mat.

DURABILITY

- Product guaranteed for two years when coupled to an annual maintenance agreement.
- Stitched seams and super velcro joins used on each section of mat.
- Secure, durable but replaceable top fixing points on each section of mat. Quick release buckle system developed by Entre-Prises.
- Foam sections can be replaced quickly and easily.
