

ROCK 'N' ROAD mobile tower

Custom made shape and design
Seamless climbing surface

ROCK 'N' ROAD signs of quality

SAFETY

- Tower designed in accordance with certain elements of the European Standard for Artificial Climbing Structures (EN12572).
- Inspected and approved by the Trailer and Towing Advisory Service (TTAS) for use on UK roads.
- Seamless surface without any sharp edges or visible joints.
- Includes auto descent release valve. Lowers the tower, saving power.
- Impact resistant. Glass Resin Panels provide strength and stability to all designs.

QUALITIES

- Gross weight of tower generally under 2200kg.
- Option to attach Redpoint Descenders or traditional Rope Belays.
- Option to remove the tower from the trailer unit for use indoors.
- 6.5 metres high and 2.45 metres wide.
- 4no. climbing lines. 150 bolt-on holds. 2no. routes set on each climbing line.
- VanVault lockable storage box supplied as standard. Contains tower tool kit.

AESTHETICS

- Custom made and striking design imitating natural rock.
- Low, medium and high levels of featuring available.
- Custom made paint scheme and branding options available.
- Complete and continuous climbing surface with no visible joints.
- Option to include additional buzzer / lighting units.

DURABILITY

- One fully charged battery provides 25 to 30 raises and lowers of the tower.
- Manufactured, serviced and maintained within the UK.
- UK based After Care and Service centre available 8.30am - 5.30pm daily.
- Tower guaranteed for five years. Trailer guaranteed for 2 years.
- Durable climbing surface that is easy to clean.
- Fully galvanised, stainless steel fixings used throughout trailer and tower.
