

SHELL CONCRETE

An all weather outdoor system
For caves and climbing walls

SHELL CONCRETE signs of quality

SAFETY

- Construction system designed by Entre-Prises' in-house technical department in accordance with the European Standard for Artificial Climbing Structures (EN1257-2).
- Seamless surface without any sharp edges or visible joints.
- Individual top-rope system with screwgate and snapgate carabiners featuring easy-clip gates and shrouded noses.
- Impact and fire resistant.

QUALITIES

- Recreates any rock formation, feature or style of climbing. Striking, architectural designs can be created.
- The wall can be equipped with leader protection points to allow ground-up ascents of each climbing line.
- 5 to 12 bolt-on hold inserts/m² subject to the level of featurig specified.

AESTHETICS

- Custom made and striking designs. Perfect re-creation of natural rock.
- Low, medium and high levels of featurig available.
- Custom made paint scheme, complimenting the surrounding areas.
- Complete and continuous surface with no visible joints.

DURABILITY

- Product guaranteed for five years when coupled to annual maintainance agreement.
- One maintenance visit/inspection per year recommended.
- Mechanical anchor inserts: do not spin, do not fall out.
- Stainless steel fixings supplied for outdoor installations.
- Durable, hard wearing, robust and vandal proof. Easy to clean.
